Agenda of Meeting

The agenda of the meeting is to discuss development and finalization abstract system design

Discussion

So basically the food panda application is built on main 4 layer architecture that separates the concerns of application into distinct layers, each responsible for specific set of tasks. User interface layers interacts with application layer, which in turn communicates with database layer to fetch and store data. Integration layer provides necessary connectivity to external systems and services. So we discussed development processes and then finalized the abstract system design.

Approval of Minutes

The minutes were read by the Scrum Master and approved.
